HYPNEA 3

CIDELEC polygraph

Listening to understand better

CIDELEC

Explore the unique functions of Hypnea 3 and how they are redefining sleep studies.

Unique

Associated with **PneaVoX®**, Hypnea 3 integrates the raw re-listenable tracheal sounds for improved understanding of the pathology and easier patient education.

Intuitive

A solution designed for the patient. Its intuitive interface and tutorial video adapt to all profiles for fully autonomous placement.

Modular

Thanks to an integrated Bluetooth interface, Hypnea 3 can acquire signals from optional modules (Leg EMG, machine recording, etc.)

Technological

Perfect combination of design and cutting edge technology, Hypnea 3 integrates the **HypnoLighT** function.
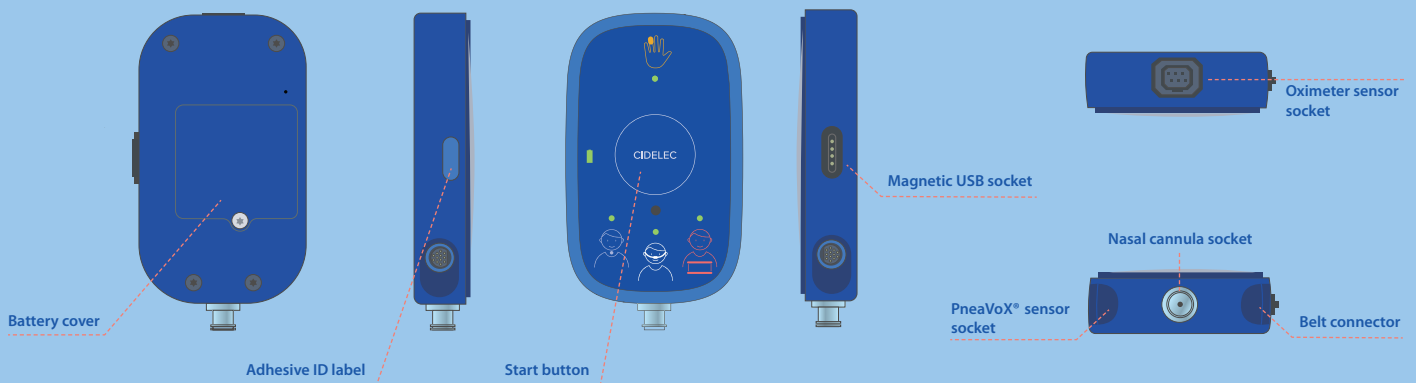

Compact

Its compact format, lightness and silicone wristband ensure optimum comfort, guaranteeing reliable data all night long.

Durable

Easy to repair, requiring less energy and equipped with reusable sensors, Hypnea 3 minimizes its environmental impact.

Technical specifications

Battery cover

Adhesive ID label

Start button

Magnetic USB socket

Oximeter sensor socket

Nasal cannula socket

PneaVoX® sensor socket

Belt connector

Specifications

Signals availables	Suprasternal pressure, breathing flow, nasal pressure, thoracic and abdominal efforts, snoring (sic), raw sounds, brightness, position, actimetry, SpO2, BPM, PPG.
	Optional: HLT ExG, EMG, PTA, Thermocouple
Raw sound signal	2KHz
Wireless interface	Bluetooth® V5.0 (BLE)
Memory capacity	256 Mo, transfer time 20 secs (excluding raw sounds)
Power supply	720 mAh LiPo battery, charges in 4 hours
